Press Release

Eurocors Valentines Trial published in EuroIntervention

The Valentines Trial: results of the first one week worldwide multicentre enrolment trial, evaluating the real world usage of the second generation DIOR® paclitaxel drug-eluting balloon for in-stent restenosis treatment

Bonn, Germany, 02. September 2011 – Eurocor today announced the publication of the Valentines Trial in EuroIntervention electronically ahead of print. “We do hope that this database might have impact on patient treatment. All the honor goes to the 96 investigators from all 26 countries worldwide”, says Rembert Pogge von Strandmann, Clinical Director, Eurocor. The Valentines Trial database actually represents the largest group of ISR patients enrolled till date using a DEB to show effectiveness in treatment of in-stent restenosis (ISR). The DIOR® drug-eluting balloon (DEB) shows that it is safe and offers patients a treatment option for ISR without a second implant.
