### **Eurocor: Top-rate symposium at the TCT**

**Bonn life sciences company Eurocor organises symposium at the leading US congress for interventional cardiology in Washington.**

Bonn, 8 September 2010 – "Drug-eluting balloon DIOR – Insights in Concept and Clinical Application": This is the title that will bring leading health professionals together in Washington on 22 September 2010, at the invitation of Eurocor GmbH, Bonn/Germany. This is the venue of the Transcatheter Cardiovascular Therapeutics (TCT) 2010, the leading congress on interventional cardiology in the United States, from 21 to 25 September.

The Eurocor breakfast symposium will be beginning already at 7 in the morning, in room 159 B, and will be attended by experienced health professionals from Austria, Argentina, Italy, Spain, the USA and Germany. The symposium will be chaired by Pieter R. Stella from Utrecht University Hospital in the Netherlands. All the participants will be reporting on their experience with the DIOR catheter and presenting the latest study results to their colleagues.

The TCT congress is organised by the Cardiovascular Research Foundation (CRF), an independent, scientific non-profit organisation that aims to improve the quality of life for people with cardiovascular

problems. Every year, the TCT is a meeting place for leading scientists and doctors to discuss the latest developments on the cardiovascular sector.

"The world's leading experts in cardiovascular medicine will be meeting in Washington. It will be our great pleasure to present Eurocor's latest successful developments to this top-rate audience", says Katja Hausner, Director Corporate Business Affairs at Eurocor.

The company

**Eurocor GmbH** is a rapidly growing life sciences company specialising in the research, development and manufacture of cardiovascular catheter devices and coronary stent technologies. The products manufactured by the company in Bonn are used in minimally invasive cardiovascular surgery and comply with biological and biomechanical principles to offer highly flexible, adaptable solutions. Eurocor has developed an innovative method for drug-eluting balloon catheters with maximum patient safety and compatibility.
